

Pareto Chart is a type of bar graph for qualitative data, with the bars arranged in order according to frequencies. The tallest bar is to the left, and the smallest bar is to the right. The x-axis has just categories, no numbers. (p57)

Scatter Diagram is graphical display of ordered paired data (x, y). (p51)

Time Series is a data set composed of entries taken at regular intervals over a period of time. (p59)

Pie Chart is graphical representation of data in the form of a circle containing wedges.

Make a pie chart of the following information:

9 red marbles : 16 blue marbles : 10 yellow marbles : 5 green marbles
